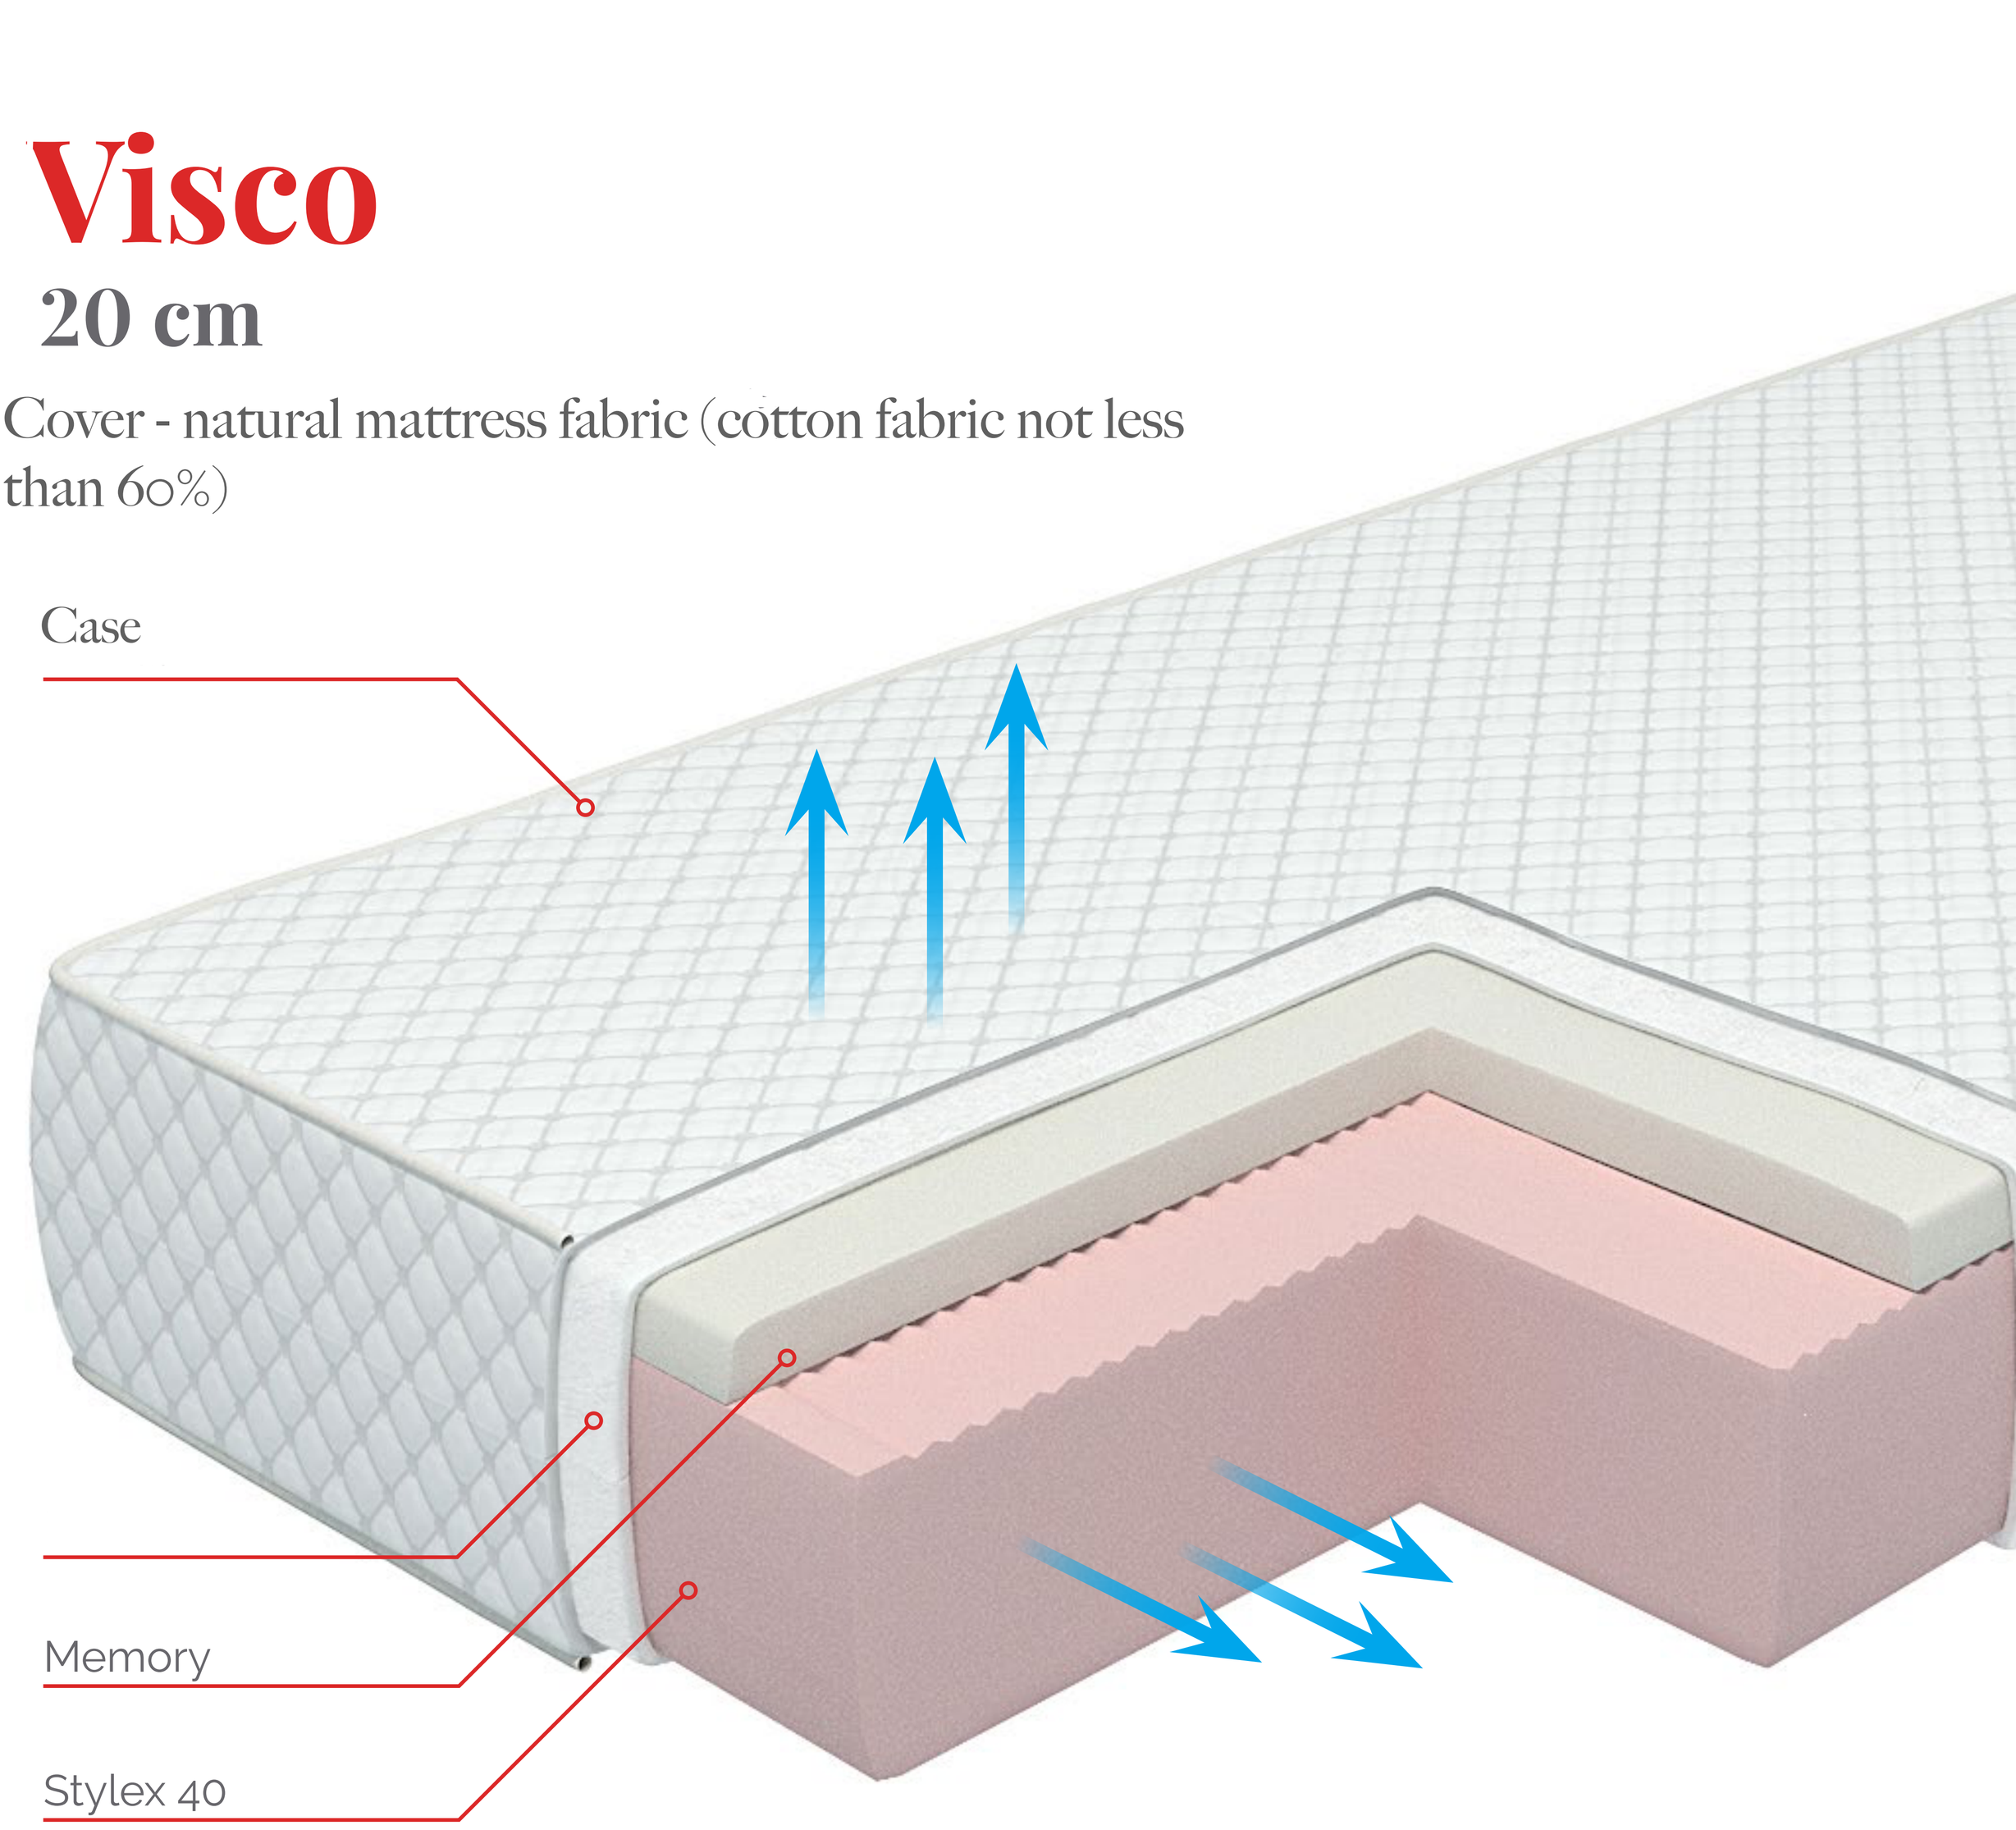
Visco

20 cm

Cover - natural mattress fabric (cotton fabric not less than 60%)



Service life of at least 5 years

The mattress does not require to change sides during use

Zippered case, removable, easy care

Permissible load up to 90 kg (for one part of the mattress)

The anatomical mattress "Visco" is tight enough to provide solid support for the body and at the same time soft enough. The mattress consists of filling two layers of foam. We use a hard layer of Style 40 for the base, the top layer is made of Memory foam - a memory material that perfectly follows the shape of the body and balances the pressure during sleep. The mattress will not lose its unique shape and the ability to adapt to the body even after long use. The mattress has antibacterial qualities. Dust mites free. It is especially recommended during rehabilitation after injury or with spinal problems.
